Abhi Agarwal

## 1 Bottom-up parsing

### Question 1.1

The first few moves for parsing the string  $(n*n)^*n$  bottom-up look. Write down the remaining moves.

Stack	Input	Action
\$	$(n*n)^*n\$$	shift
$\$($	$n*n)^*n\$$	shift
$\$(n$	$*n)^*n\$$	reduce $F \rightarrow n$
$\$(F$	$*n)^*n\$$	shift
$\$(F*$	$n)^*n\$$	shift
$\$(F*n$	$)^*n\$$	reduce $F \rightarrow n$
$\$(F*F$	$)^*n\$$	shift
$\$(F*F)$	$*n\$$	reduce $(E) \rightarrow (F*F)$
$\$(E)^*$	$n\$$	shift
$\$(E)^*n$	$\$$	reduce $F \rightarrow (E)$
$\$F*F$	$\$$	reduce $n \rightarrow F$
$\$F*E$	$\$$	reduce $E \rightarrow F$
$\$E$	$\$$	accept

### Question 1.2

Compute the ITEMS and CLOSURE sets for the grammar in the previous question.

ITEMS

**$E \rightarrow F * E \mid F$ :**

$E \rightarrow \cdot F * E \mid \cdot F$

$E \rightarrow F \cdot * E \mid F$

$E \rightarrow F * \cdot E \mid F$

$E \rightarrow F * E \cdot \mid F$

$E \rightarrow F * E \mid F \cdot$

**$F \rightarrow (E) \mid n$ :**

$F \rightarrow \cdot (E) \mid \cdot n$   
 $F \rightarrow (\cdot E) \mid n$   
 $F \rightarrow (E \cdot) \mid n$   
 $F \rightarrow (E) \cdot \mid n$   
 $F \rightarrow (E) \mid n \cdot$

CLOSURE set

$E \rightarrow \cdot F * E: E \rightarrow \cdot (E) * E$   
 $E \rightarrow \cdot F: E \rightarrow \cdot (E), E \rightarrow \cdot n$

$E \rightarrow F \cdot * E: E \rightarrow (E) \cdot * E$   
 $E \rightarrow F \cdot : E \rightarrow \cdot (E), E \rightarrow n \cdot$
